Let's identify geometrical shapes

* As shown in the picture, trace the edges of the objects with your pencil and draw the shape of the object. Observe the sides of the object.

This is a	A circle has	This is a	This is a
rectangle.	only one curved	triangle.	square.
A rectangle	edge and no	A triangle has	A square has 4
has 4 sides.	straight side.	3 sides.	sides.

Try the fun activities given below:

* Activity 1: Make a paper boat. Unfold it and count the numbers of triangles and four-sided figures; and colour any

two triangles and four-sided two figures.

* Activity 2: Make triangles and four-sided figures using match

sticks or small wooden strips.

* Activity 3: Find out the tools of games in which you see

triangles, four-sided figues and circles.

* Activity 4: Make a picture using the shapes Δ , \square , \bigcirc etc.

Give children practice in drawing various shapes using articles of daily use. Also give them practice in drawing these shapes freehand.
