

# Addition and subtraction of Zero

## Adding zero and subtracting zero.

Three apples in one dish. None in the other. Only three apples in all.

Rama has 2 apples. Her little sister loves apples. So, she kept both for her. She did not eat any.

If zero is added to any number, we get the same number again. We get the same result when we subtract zero.

Write the proper number in each empty box :

$2 + 0 = \square$	$4 + 0 = \square$	$7 + 0 = \square$
$19 + 0 = \square$	$27 + 0 = \square$	$65 + 0 = \square$
$78 + 0 = \square$	$0 + 0 = \square$	$6 + \square = 6$
$3 - 0 = \square$	$5 - 0 = \square$	$8 - 0 = \square$
$11 - 0 = \square$	$19 - 0 = \square$	$23 - 0 = \square$
$55 - 0 = \square$	$82 - \square = 82$	$\square - 0 = 17$
