A Stock Market is an important constituent of Capital market. It is a part of the financial market where corporate securities are bought and sold. It is an organised Capital market where second hand securities are bought and sold for investment and speculation purposes. Only listed Securities can be traded on a stock exchange.

Listed Securities : *Securities those are included in the trading list of the stock exchange. To get its securities listed, a company has to apply to the stock exchange and comply with its rules and regulations.*

A Stock Exchange is also called as a Secondary Market or Stock Market or Share Market or Share Bazar.

12.1 STOCK EXCHANGE : MEANING

Stock exchange is a specific place where various types of securities are purchased and sold. The term securities include equity shares, preference shares, debentures, government securities and bonds, etc. including units of Mutual Funds. Stock markets act as intermediary between investors and borrowers. To provide safety and stability to the investors, Stock exchanges in India are regulated by SEBI.

London Stock Exchange which was founded in 1571 is the oldest Stock Exchange in the world while Bombay Stock Exchange which was founded in 1875 is the oldest stock exchange in India.

Definitions of Stock Exchange :

According to the Securities Contracts (Regulation) Act 1956, the term stock exchange is defined as, “An association, organization or body of individuals, whether incorporated or not, established for the purpose of assisting, regulating and controlling of business in buying, selling and dealing in securities.”

Husband and Dockerary have defined stock exchange as :

“Stock exchanges are privately organized market which are used to facilitate trading in securities.”

The important features of a stock exchange are as follows -

- 1. Market for Securities :** Stock exchange is a place where all types of corporate securities as well as securities of government and semi-government bodies are traded.

2. **Second Hand Securities** : Securities traded in Stock exchange are those securities which are already issued by the companies. In other words, second hand securities are bought and sold among investors in a stock exchange.
3. **Listed Securities** : Only securities that are listed with the stock exchange can be traded on a stock exchange. Listing of securities helps in protecting the interest of investors as companies have to strictly comply with the rules laid down by the stock exchange.
4. **Organised and Regulated Market** : All Listed Companies have to comply with the guidelines of SEBI. Companies will also have to function as per the rules and regulations laid down by the Stock exchange.
5. **Specific Location** : Stock exchange is a specific physical place where securities are traded. It is a market place where brokers and intermediaries meet to conduct dealings in securities. Today, all trading is done electronically on a stock exchange.
6. **Trading only through Members** : Securities in a Stock exchange can be traded only by the members of the exchange on their own behalf or through authorised brokers.

- **Management of Stock Exchange :**

Executive committee of stock exchange looks after the overall activities and management of stock exchange. The composition, powers and the name of the executive committee differs from exchange to exchange. There are other supporting committees to assist the executive committee like advisory committee, listing committee, etc.

- **Organization Structure of Stock Exchanges in India :**

In India, the stock exchange may be organized in one of the following three forms.

- i) Voluntary non-profit making organization.
- ii) Companies with liability limited by shares
- iii) Companies with liability limited by guarantee.

The Securities Contract (Regulations) Act 1956, provides rules for their functioning, licensing, recognition and for controlling speculations.

- **Membership of Stock Exchange :**

The eligibility criteria for membership may differ from stock exchange to stock exchange (For additional information refer website of respective stock exchange.)

12.2 FUNCTIONS OF STOCK EXCHANGE

1. **Mobilisation of Savings** : Stock markets are organised and regulated market which protects the interests of the investors. This encourages small and big investors to invest in securities through the stock exchange. It thus provides a ready market for buying and selling securities.
2. **Capital formation** : Investors in securities are attracted due to good returns on investments and capital appreciation. This attracts more investors to invest through the stock exchange. Corporates too can easily raise funds by offering various types of securities to meet the needs of different types of investors. Thus Stock exchange serves as a tool for capital formation.

3. **Pricing of Securities** : The stock market helps to value the securities on the basis of demand and supply factors. The securities of profitable and growth oriented companies are valued higher as there is more demand for such securities. The valuation of securities is useful for investors, government and creditors. The investors can know the market value of their investment. The creditors can estimate the credit worthiness of a company.
4. **Economic Barometer** : A stock exchange is a reliable barometer to measure the economic condition of a country. Every major change in country and economy is reflected in the prices of shares. The rise or fall in the share prices indicates the boom or recession cycle of the economy. Stock exchange is also known as a pulse of economy or economic mirror as it reflects the economic conditions of a country.
5. **Protecting Interest of Investors** : Stock exchange protects the interest of investors. In stock market only the listed securities are traded. Stock exchange allows listing only after verifying the soundness of company. The companies which are listed have to operate within the strict rules and regulations laid down by the stock exchange. This ensures safety of dealing through stock exchange.
6. **Liquidity** : The main function of stock market is to provide ready market for sale and purchase of securities. The presence of stock market gives assurance to investors that their investment can be converted into cash whenever they want. The investors can invest in long term investment projects without any hesitation, as because of stock exchange they can convert long term investment into short term and medium term or even liquidate their investments whenever they want.
7. **Better Allocation of Capital** : The shares of profit making companies are quoted at higher prices and are actively traded so such companies can easily raise fresh capital from stock market. The prices of securities traded in the exchange indicates the opportunities for investments. So stock exchange facilitates allocation of investors fund to productive and profitable channels.
8. **Contributes to Economic Growth** : In stock exchange, securities of various companies are bought and sold. Investors invest in companies which give good return on investments. Hence companies, too, try to invest in most productive investment projects. This leads to capital formation as well as economic growth.
9. **Providing Scope for Speculation** : To ensure liquidity and demand or supply of securities the stock exchange permits healthy speculation of securities.
10. **Promotes the Habit of Savings and Investment** : The stock market offers attractive opportunities of investment in various securities. These attractive opportunities encourage people to save more and invest in securities of corporate sector rather than investing in unproductive assets such gold, silver, etc.

12.3 MAJOR STOCK EXCHANGES IN INDIA

Following are the two most important Stock Exchanges in India.

1. **Bombay Stock Exchange (BSE)** : BSE - Bombay Stock Exchange, was set up in 1875. At that time it was called as The Native Share and Stock Broker's Association. It is located in Dalal Street in Mumbai.

It is Asia's first Stock exchange. It is the first listed stock exchange in India. It is the 11th largest stock exchange in the world in terms of market capitalisation. It has the largest number of companies listed with it. (Approximately over 5000 companies are listed in the BSE.) It is now a demutualised and corporatized entity registered under the Companies Acts, 1956.

The BSE switched to an electronic trading system in 1995. This automated, screen-based trading platform is called BSE On-Line Trading (BOLT). The BSE has also introduced a centralized exchange based internet trading system, **bsewebx.co.in** to enable investors anywhere in the world to trade on the BSE Platform.

- 2. National Stock Exchange (NSE) :** NSE was set up by a group of leading Indian Financial Institutions in 1992 as a company and was recognized as a Stock Exchange in 1993 under the Securities Contracts (Regulation) Act, 1956. It started trading activities in 1994. It is the largest and most modern stock exchange in India.

The NSE is located in Mumbai. It was the first demutualized electronic exchange in India. NSE was the first exchange in the country to provide a modern, fully automated screen-based electronic trading system which offered easy trading facility to the investors. The main index of NSE is the NIFTY which was launched in 1996.

12.4 IMPORTANT TERMS RELATED TO STOCK EXCHANGE

- 1. Broker :** He is a member of a stock exchange who is licensed by stock exchange to buy or sell shares on his client's behalf. He is an agent between the investors and Jobber. His income is in the form of commission or brokerage.
- 2. Jobber :** A Jobber is a dealer in stock exchange who carries on trading of securities in his own name. He buys securities as an owner and sells them at a higher price. The profit he makes is his income.
He is a professional speculator in the stock exchange. He is not permitted to deal with investors directly.
- 3. Bull (Tejiwala) :** A Bull is a speculator who expects the price of a share to rise in the future and buys with the hope of selling them at the higher prices to earn profit. His views are optimistic. Bulls actions leads to higher prices for securities as there is excess of purchase over sales.
- 4. Bear (Mandiwala) :** A bear is a speculator who expects fall in the price of a security. Hence he sells his securities at the prevailing prices to avoid loss as he expects further fall in prices. Bears action leads to lowering the prices of securities as there is excess of sales over purchase.
- 5. Stag :** A stag is a member who buys new issues of securities from Primary market and sells them later at higher prices, when the securities are listed, on the stock exchange.
- 6. Lame Duck :** A lame duck is a bear broker whose expectations have gone wrong and makes a loss in his dealings. In other words, he had expected the prices of securities to fall (so he sold his securities) but instead, the prices have gone up.
- 7. Wolves :** A Wolf is a broker who is a smart speculator. He is quick to judge the trends in the market and trades quickly thereby making profit.

8. **Settlement** : It refers to the scrip wise, i.e. security wise netting of trades by a broker after the trading period is over. (e.g. for equity spot markets it is T + 2 days T.i.e. Trading day.)
9. **Contract Note** : It is a note given by a broker to his client. It will be in a specific form. It validates the transaction. Both the broker and the client will have one copy each immediately after the transaction within 24 hours.
10. **Trading Ring** : The trading or auction of shares takes place on the floor of the stock exchange which is also known as Trading Ring. These days there is no trading room as all transactions are done electronically.
11. **Insider Trading** : Insider trading is the trading of a public listed company's securities by individual with access to non-public information about the company. Trading based on insider information is illegal. This is because it is seen as unfair to other investors who do not have access to the information.
12. **Day Trading** : The practice of buying and selling of securities within the same trading day before the close of the markets on that day is called 'Day Trading'.
13. **Sensex** : It is the Index of the BSE which represents the increase or decrease in prices of stocks of selected group of companies. Sensitive Index called as Sensex is made up of 30 largest and actively traded stocks of listed companies. It was created in 1986.

Index is a measurement of changes in the security prices. It is the benchmark index of the stock market.

14. **Nifty** : It is the index of the NSE. It is made up of 50 listed companies. It includes all the 30 Sensex stocks. It was created in 1996.
15. **Rally** : If the Sensex or Nifty moves in upward direction over a period of 14 to 20 trading sessions, it is called as a Rally. Bulls are active during the market rally.
16. **Crash** : If the Sensex or Nifty moves in downward direction, it is called as a crash. Bears are active during this period.
17. **Market capitalisation** : It is the total value of a company's outstanding (issued) shares multiplied by its current market price. It indicates the worth of the company.
18. **Stop-loss** : It is an instruction or order given by an investor to the broker to buy or sell a security when it reaches a certain price. This instruction is given by the investor when he wants to avoid losses when the prices fall below the stop price.

12.5 Securities and Exchange Board of India (SEBI)

The Securities and Exchange Board of India (SEBI) is the regulator of the capital markets in India. The SEBI was established in 1992 under the Securities and Exchange Board of India Act, 1992. It has its headquarters in Mumbai and has many regional and local offices all over India.

12.5.1 Functions of SEBI :

SEBI was set up with the objective of promoting the securities market, protecting the interest of the investors in securities market and to regulate the securities market. SEBI issues rules and regulations to be followed by the issuers of securities, the market intermediaries and the investors. It is a regulator of all the Stock exchanges in India.

The various functions of SEBI are -

1. To protect the interest of investors in securities market.
