Number song and finger caps

Cut circles of about 5 cm diameter. Cut each of them into 3 equal parts. Make a cap of each piece using a gum tape. See that children participate in the activity. They will enjoy, exchanging the caps and playing with them.

It is easy to count the objects only after reciting the numbers from one to ten. So ask the children to sing the number song. Students will happily practise reciting from one to ten by singing the song.

One two three, four five six seven eight
nine ten, my fingers are ten.
Let's count them, now and again,
everybody has fingers just ten.

Decorate them, with papercaps,
that are so, easy to get
Red Yellow, blue purple,
or is the white your best

How many, caps everybody
then should obtain
Each finger, to have a cap
then, the caps also ten.
